Member Engagement: The Holy Grail

- Enrollment
- Visits
- Only 5-10% use online portals per year

Leading the Way

Improved website design and information architecture

The majority of your visitors are only trying to access a small portion of functionality.

Member portal and app enhancements

Pension portals are a big time saver and resource for members. How some are systems are leading the way.

Website accessibility

With SB 434 now in effect, the bar is set for ADA-compliance and websites. See how state systems are keeping up.

1. Improved website design and IA

How systems like ACERA & NYCERS are using data to elevate the member experience.

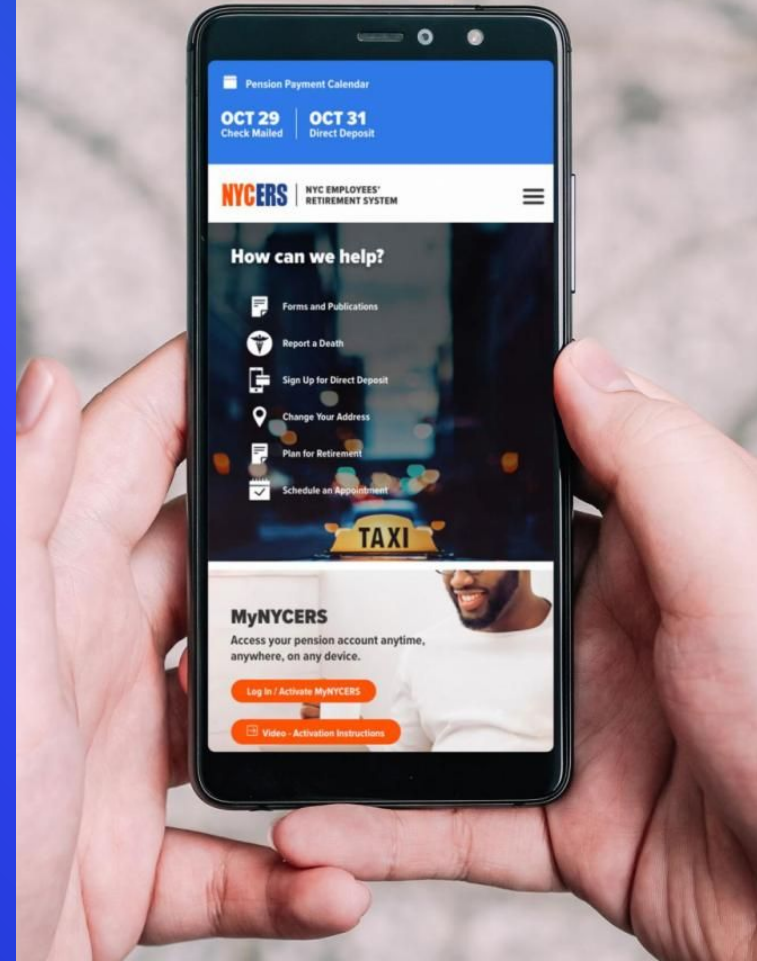

The design challenge

- 90% of users access less than 10% of your stuff
- Less than 5% use search, if site is designed correctly
- Site problems lead to more call center volume
- Discovery / analytics needed

New York CERS

Most common questions

1. “When is my pension payment coming?”
2. “How do I activate my member account?”
3. “How do I report a death?”

How can we help?

Reciprocity

Reciprocity refers to a legal relationship between SCERS and other California public retirement systems intended to encourage careers in public service and to connect retirement benefits earned by employees under two or more systems.

Reciprocal retirement systems include:

- County retirement systems governed by the County Employees Retirement Law of 1937 (1937 Act)
- California Public Employees' Retirement System (CalPERS)
- California State Teachers' Retirement System (CalSTRS)
- Judges Retirement System (JRS)
- Public retirement systems that have full reciprocity agreements with CalPERS

Reciprocity provisions apply to any member entering SCERS from a reciprocal system as

“ If you’re able to meet members with empathy, understanding, and thoughtful guidance, you’ll build trust and create new opportunities to reach them earlier in their careers.

Lindsay Hardy, Pension Strategist, Digital Deployment

2. Member portal and app enhancements

How do you modernize your member portals and apps without having to deploy a new membership management system?

The challenges

- Hard to engage early career members.
- Demographics are changing. Younger members have different expectations of technology.
- Pension modernization projects can take years and cost millions of dollars. You are already behind the curve when you launch.

Self-Service Portal/App Approaches

Self Managed

Managed by IT, connects directly to database.

3. Web Accessibility

How CalSTRS completely revamped their website to create an accessible and compliant experience for all users.

Why is accessibility important?

1. Social responsibility: including individuals with disabilities is the right thing to do
2. Good business practice: 15 - 20% of the population has a disability that may affect their ability to get the information they need from your site
3. Increases search engine optimization / findability
4. Legality: government agencies are required by law, to meet website accessibility guidelines

ACCESSIBILITY

REQUEST FOR ACCOMMODATION

Dear Maria Waldrop;

On 3/18/19 I went to your information site (the website www.itsmymaitland.org) trying to learn about the governmental functioning of Maitland, Florida through the documents you provide within your site.

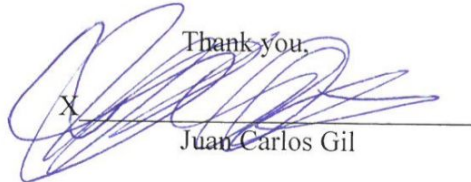

I am legally blind, so I depend on a screen reader to help me understand electronic documents. My screen reader would not work with your electronic documents. I was specifically interested in documents related to the budget of the City of Maitland, Florida (electronic documents) for 2018, 2017, 2016 and 2015 and all City Commission agendas and back up material for year 2018, 2017 and 2016. Would you please make these documents accessible in your site so that they will work with screen readers?

I have visited www.itsmymaitland.org in the past and I continue to desire to visit www.itsmymaitland.org in order to become an active participant in the Maitland, Florida governmental process and to become informed about the programs, services and activities offered by Maitland, Florida as related to my intended future visits to Maitland, Florida.

Your site has many other electronic documents other than the specific ones which I have asked for above. In addition to the specific documents listed here, can you also make the other electronic documents within your site accessible so that they will work with screen readers so I don't have to take the steps to ask for each document in a mail request?

I appreciate your reply as soon as possible.

Thank you,

X 

Juan Carlos Gil

AB 434 - CA Accessibility Mandate

001

Section 508

A law referenced by the ADA that more specifically outlines how to meet accessibility standards for electronic content, including websites.

2

1

WCAG Guidelines

The international web accessibility guidelines that are referenced (directly and indirectly) by both state and federal laws regarding web accessibility. These guidelines form the foundation of laws and requirements.

3

ADA Compliance

The Americans with Disabilities Act protects the rights of people with disabilities. Its broad reach extends to websites, but doesn't reference web accessibility specifically.

“Website accessibility” ?

Visual: blindness, low vision, color-blindness

Hearing: deafness and hard-of-hearing

Motor: Inability to use mouse, limited fine motor control

Cognitive: learning disabilities, distractibility, inability to remember or focus on large amounts of information

People with disabilities often rely on assistive technology (AT) - screen readers, browser zoom, text to speech, etc...

What does accessibility cover?

- Font colors and contrast (low vision, color blind)
- Text alternatives for any non-text content so that it can be changed into other forms (braille or screen readers)
- Labels on form fields so a visitor knows what each field is for
- Captions on videos (especially meetings!)
- It also applies to PDFs

Common pitfalls

1. No closed captions on video/audio files
2. Not having accessible PDFs / documents
3. Not having ALT tags for images
4. Lack of labels on form fields
5. Lack of color contrast
6. Not having a mobile-responsive site or semantic HTML

UPDATES

CalSTRS statement on SEC proposed regulation

How Will You Spend Your Future?

CalSTRS compliance process

1. Ensure responsive site design (color contrast, navigation, aria labels, screenreader callouts)
2. Ensure compliance with AB 434
3. External audit by LevelAccess (and AMP page scans)
4. Ongoing scanning by Monsido for PDF remediation
5. Ensured closed captioning

Tom O'Hair

CalSTRS
Accessibility
Champion

How to check

1. www.achecker.ca
2. Google Lighthouse (F12 in Chrome)

Scans only test for a handful of accessibility issues, but can be a good place to start to see if you fixable problems.
